

Fleek Newsletter Documentation

Overview

Fleek Newsletter Pro is a Joomla system plugin that helps you add newsletter integration and subscription-related features to your website.

Installation Steps

1. Download the Fleek Newsletter plugin package.
2. Log in to your Joomla administrator panel.
3. Go to **System > Install > Extensions**.
4. Upload the plugin package file.
5. Click Install.
6. After installation, open the plugin settings to configure your newsletter provider and options.

How to Use

1. Enable the Plugin

- Go to **Extensions > Plugins**.
- Search for "**Fleek Newsletter Pro**".
- Enable the plugin.

2. Configure Provider Settings

Set up the newsletter service you want to use, such as:

- **Mailchimp**
- **Flodesk**

Enter the required **API keys** in the plugin settings.

3. Create a Newsletter Form

Use the plugin's output or integration point in your Joomla site to display a newsletter signup form.

4. Customize the Display

You can configure:

- form title
- button text
- success/error messages
- styling
- provider settings

5. Test the Subscription Flow

- Save the plugin settings.
- Test the signup form from the front end.
- Confirm that subscriptions are sent correctly to your newsletter provider.

Tips

- Make sure your API credentials are correct.
- Test with a test email address before going live.
- Check that the plugin is published and enabled.

Support

For help, contact the plugin author or refer to the included package files and documentation.
